Seneca Polytechnic, Toronto, ON, 2022 – present

Completed courses: Intro to Database Systems, Advanced Database Systems, Object Oriented Programming on **C++**, Software Development Using **C++**, Web Programming Principles, Web Programming Tools and Frameworks, Web Programming Apps and Services, Software Analysis and Design I, II, Data Structures and Algorithms on **Python**

PROJECTS

Personal full-stack “E-Commerce” website

June – July 2023

- Implemented a responsive UI using React.js, providing a smooth browsing experience.
- Developed modular and reusable UI components using styled-components.
- Utilized API requests to retrieve product data from a MongoDB database.
- Exploited Redux for state management, allowing for efficient data handling.
- Provided data integrity and security by using JWT for secure authentication and authorization along with Express.js and Node.js for server-side development.
- Developed a secure user authentication system which includes such features as login, registration, and logout.
- Created a shopping cart feature that allows users to add, view and alter products, as well as save their cart for further sessions.

Personal Portfolio

July – August 2023

- Implemented a personal portfolio using React.js, Three.js and Styled-components
- Created responsive UI using React.js
- Developed modular and reusable UI components by using styled-components

- Included 3-d model implemented using Three.js
- Created feature to download my resume along with links for redirection to GitHub, LinkedIn, and my another project
